### Professional Experience

09/2019 – present  
Remote

#### Microverse [↗](#)

##### Practice Session Coordinator

- Coordinates online meetings with the purpose of helping people with no/low experience in solving Javascript algorithm challenges.
- Has spent 150+ hours tutoring people from all over the world, improving communication skills and empathy, while talking with people from the most diverse cultures and background.

06/2019 – present  
Remote

#### Microverse [↗](#)

##### Technical Support Engineer

- Has reviewed 350+ Pull Requests for more than 100 students on HTML/CSS, Javascript, Ruby and Rails projects, providing code feedback and suggesting changes based on best practices.
- Has given assistance to students, helping them to improve their projects and answering questions related to problem solving and the technologies used (HTML, CSS, Javascript, Ruby, Rails, webpack).
- Has improved problem solving skills by watching other people's solution, leading in the learning of new techniques and different approaches to deal with the same problem.

05/2019 – present  
Remote

#### Microverse [↗](#)

##### Mentor (Volunter)

- Have mentored junior web developers, providing technical support through code reviews.
- Have proposed improvements to code organization to improve code quality and overall performance.
- Have provided advice and tips on how to maintain motivation to keep longevity in the program.

### Education

03/2019 – 02/2020  
Remote

#### Microverse [↗](#)

##### Full-Stack Developer Training

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard gitflow, and daily standups to communicate and collaborate with international remote developers.

## Courses

04/2020 – present  
online

### Full-Stack Developer Bootcamp [↗](#)

*Rocketseat*

Developing Gobarber app, an application that it's being designed to manage customers of a barber shop. The app development began from scratch, using the most recent technologies from the market. The back-end uses Node, the front-end and the mobile are being built with React and React-Native.
